Now once you have chosen a product it's time to create traffic. For traffic we will be using social media traffic. We will be harnessing the power of Facebook groups. I am going to show you a strategy that you can follow and implement which provides **HQ** unlimited traffic for pennies.

Step 2 - Creating traffic - Find a group

There are many ways to find hQ facebook group to use for this strategy. I am going to show you which group to choose with a simple method.

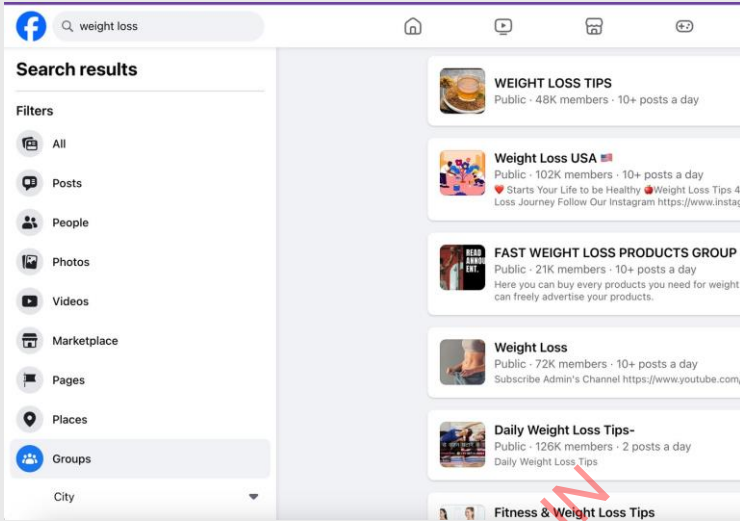

Now you will be finding a group according to your product.

Head over to the Facebook and write your main product keywords into the search bar.

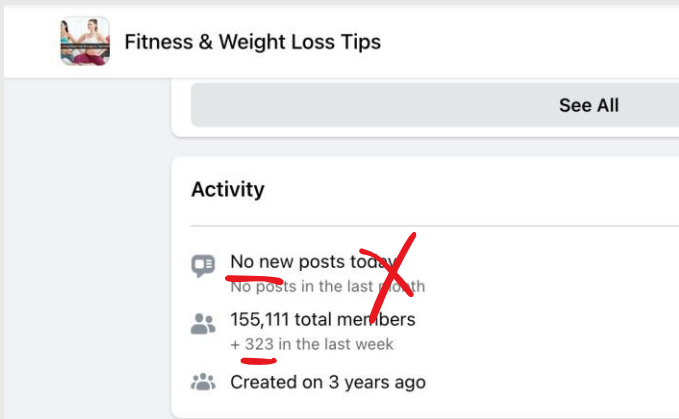

For this example I will be choosing weight loss product.

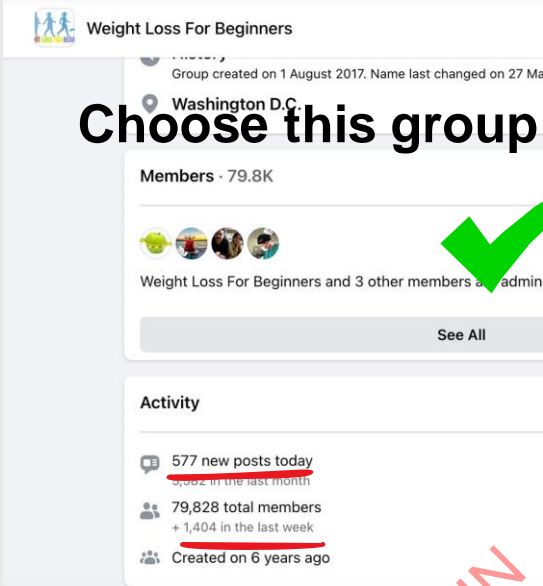

Always use groups from Tier 1 countries which is

USA/UK/AU/CA/EU.

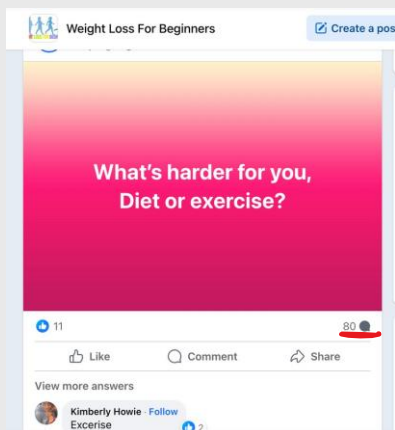

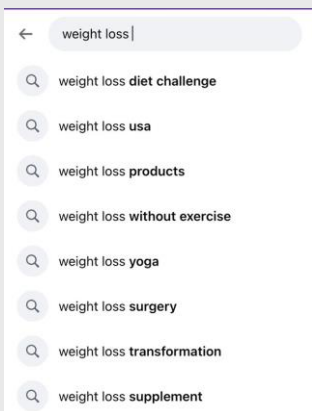

Choose a group that is active and have massive engagement on the post. Do not choose a group that have no engagement at all.

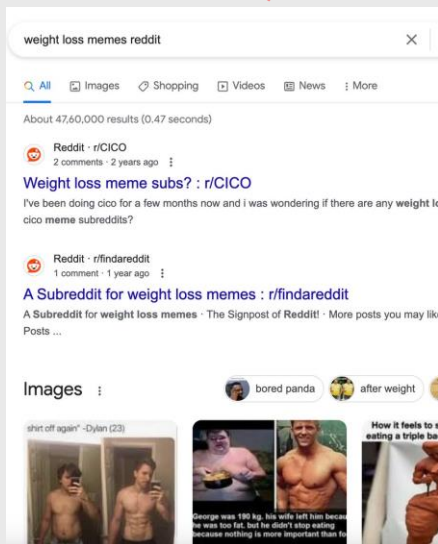

Also you can choose keywords from the suggestions and start looking for groups. You need to collect atleast 30-40 groups which are active and highly engaged.

Step 3 - Ranking posts and getting traffic

Now once you have chosen a highly engaging group its time to post in it and harness the traffic from Facebook group to our destination link. But first we need to create reach in Facebook groups. Many time you may have noticed some people get hundreds of likes on post and some get zero it's because people who get hundreds of likes on post have made their ID reach high in that particular group.

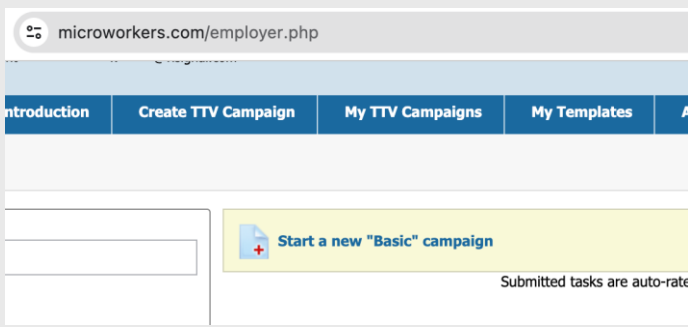

To increase your reach to the audience you need to be active in that group and post frequently. 1-2 post a day is enough to create a reach. Best way to create reach and get reaction out from people is to post memes in your niche. To find a trending memes in your niche type "your niche" +memes reddit in google.

This is a perfect example to create reach in group. The picture has over 1k upvotes. If it's liked over there it will be liked on facebook aswell. Now start posting this picture to groups one by one. Try to find more pictures do not repeat one picture on 30 groups. The main purpose of this strategy is to create as much as engagement on your post. The more engagement. The more FB is going to trust you and will give you massive reach. Now once you start making reach of your post , its time to create a

post of a product we are promoting. We are not throwing our affiliate link straight on fb post , there is a specific strategy which we will be using. For that we will be encouraging people to join our Telegram group by giving something for free. This way you will start making your own traffic that you can use again and again. But first we need to viral a post so that we can get more and more people on our Telegram group. To do that we are going to manipulate facebook algorithm.

We will be buying some fake engagement so that we can rank higher in the group and more and more people would join our Telegram group. For faking we will be using real people who will be commenting on a post with their real IDs. We will be using Microworkers for this. You can deposit \$10 to your account Once the account is created click on start new basic campaign.

Choose third world audience for your campaign.

Latin America

And thats it submit for review. It will be approved in 24 hrs or less. The other most important thing is what you write in a group so that people would like to join your group. The most simple way is to create a freebie or a giveaway in your Niche. For weight loss I will be providing some keto recipes that I downloaded from Pinterest and put it into a PDF format. In Facebook create a post in plain text like " **who wants 50 free keto diet recipes. Type yes and I will send you the link"**

that's it simple and plain no complex words.

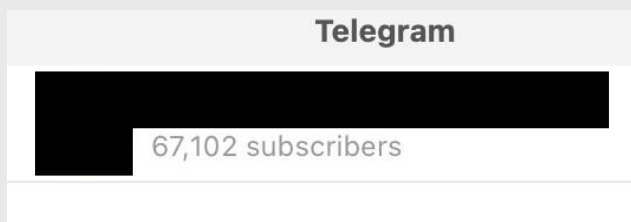

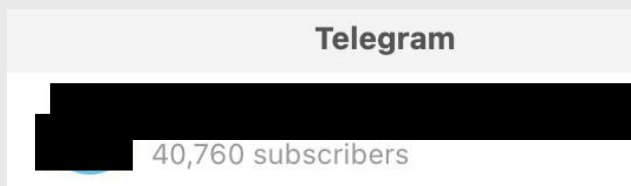

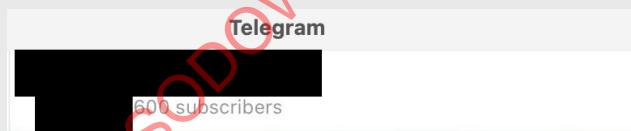

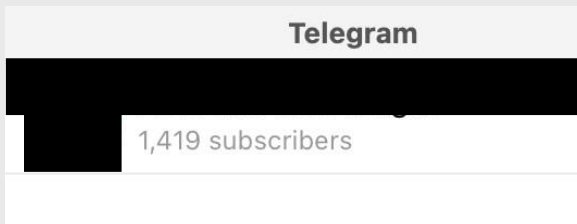

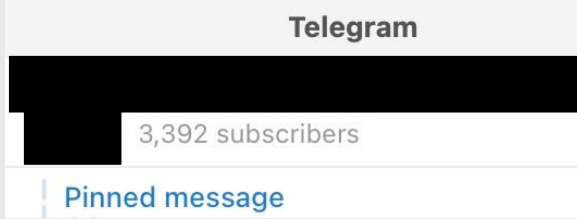

After submitting your post you will see lot of people commenting on your post also people from micro worker will be commenting on the post as well you will see huge amount of people who want what you are offering.

Now once you start getting responses on your post , reply each comment with a link of your Telegram group. Later when people join your Telegram group, keep your chat settings to admin only. First provide link to your freebie so that people could

believe this is a legit group and trust you with more suggestions. Now once people start joining your group start promoting your affiliate offers. After some continuous work your telegram traffic will look like this which you can use to make \$ easy on daily basis.

You can see this strategy have so much potential. All you need to do is continuous work.
